Elsinore Valley Cemetery is not responsible for any damage to photographs on markers or any other damage to the headstone. We use as much caution as we can to protect any/all markers, however, scratches, fading, water scaling, chipping, cracking, and/or any other damage to any marker will not be our responsibility. Our responsibility is to set the marker that you designed and purchased for your loved one at their resting place.

Any cleaning or upkeep necessary to maintain a marker is the sole responsibility of the family or a family representative. Cemetery staff will not be responsible for the cleaning of any marker and/or headstone. Employees are not permitted to clean headstones and are subject to termination for breaking policy.

If marker/headstone guidelines listed above are not followed the Elsinore Valley Cemetery staff will not accept delivery of the stone and will not install the item until all guidelines have been met. Engraving companies may contact our office for sizing questions by phone or email [district.manager@evcd.org](mailto:district.manager@evcd.org)

Note: All deliveries of headstones/markers must have an appointment and a delivery receipt. Once a headstone is received, cemetery staff makes every effort to set/install the marker as quickly as possible. However, we must work around our interment schedule and require 7 to 10 working days for a marker to be installed.

Each single full adult or double depth plot resting area may have ONLY TWO markers total. One 16" x 28" and one 12" x 18". Cremains in a single burial plot must be 16" x 28" unless it is for the second interment.

**Elsinore Valley Cemetery is not affiliated with any headstone and/or engraving company.**
